General Weathe	er condition in forthco	oming 5 days: Due to Foni cyclone weather remains cloudy and temperature will be decrease in forthcoming week.							
		Weather Prediction Based Agro-Advice							
Name of Crop	Growth Stage	Advisory							
Mango		Clean the field which is selected for mango plantation by cutting trees, shrubs and bushes.							
		Before onset of mansoon in the month of April-May dug out 1x1x1m. size pit at 10x10 m. distance and fill this pit with good so							
		and 3-4 ghamela of compost of cow dung and 3kg single super phosphate and prepare pit for plantation of mango.							
		Create shade in new mango plantation with the help of shade net. Also irrigate the basins and mulch with leaves, padd							
	Harvesting and	straw or weed.							
	New Plantation	Application of 150-200 liters of water per tree at 15 days interval as per the availability is suggested.							
		The Mango fruits are egg size stage and in mature size stage in some parts in the district. Harvest the mature fruits before							
		10 hours in the morning and after 16 hours in the evening with the help of Nutan mango harvester at 80 to 85 % maturity							
		Keep the harvested fruits in shade to prevent spongy tissue disease and from heat. Give treatment with fungicide an							
		ethylene for ripening as per the recommendations. Transport of harvested fruits should be done preferably during night hours.							
		Plantation of Cashew nut is done by using grafts.							
Cashew		In the month of April and May dugout the pit of 7x7m or 8x8m with size of 0.6x0.6x0.6m.							
		Fill the pit with 1 to 2 ghamela of compost, 1 to 2 kg Single super phosphate or Bone meal.							
	New Plantation	155 to 200 plants can be fit in 1 ha of area.							
		For controlling Termite dusting of 2% Methyl parathion 50gm powder per pit.							
		Create shade in new cashew plantation with the help of shade net. Also irrigate the basins and mulch with leaves, padd							
		straw or weed.							
Dairy Animals,		Provide good quality water for drinking and green fodder for feeding to animals.							
Goat, Sheep Poultry	-	The temperatures during day are increasing. For protection of poultry birds from heat, provide curtains from outside the							
		poultry shed and sprinkle it with water. Apply layer of grass or gunny bags on the roof of poultry shed and sprinkle water on it. Provide fresh and cool drinking water for the poultry birds and chicks.							
Soil testing	-	Do not burn stubbles of crops, leaves and weed in the field, It causes depletion of plant nutrients also decrease so							
		fertility. Soil testing of the soil should be done to check the amount of N,P,K after harvest of fruit crops. For deta							
		information contact Soil Scientist, Regional Fruit Research Station, Vengurla. (02366-262234).							
Marine Fishery	-	Foni cyclone will be reach at cost of Aandra Pradesh and Odisha on 3 rd or 4 th May, 2019 due to cyclone the wind speed increased as well as weather remains cloudy. The condition of South, East and Central Arabic Sea is moderate to rough							
		Fisherman advised to do not adventure in deep sea in upcoming 3 to 4 days.							
Fruit		Make processed preservative products from fruits of Mango, Jackfruit, Jamun, Kokum, Karonda as per availability of fruits							
processing	-								

This Agro Advisory Bulletin (AAB) is prepared and published with the consolation and recommendation of SMS committee of "Gramin Krishi Mausam Sewa (GKMS)", Regional Fruit Research Station, Vengurle and College of Horticulture, Mulde Dr. B.S.Konkan Krishi Vidyapeeth, Dapoli 416 520 (MS).
