| Weather Prediction Based Agro-Advice | | | | | | | | | | | | | | | | |
| Name of Crop Growth Stage Advisory | | | | | | | | | | | | | | | | |
| Maintain 2.5 to 5 cm water level in rice field till 30 days after sowing. | | | | | | | | | | | | | | | | |
| | | | | Application of second dose of fertilizers i.e. 870 gm of Urea per R area, if the crop has completed one month after | | | | | | | | | | | | |
| Disc | | Till a size as | - | transplanting. | | | | | | | | | | | | |
| Rice | | Tillering | | Before application of fertilizers, complete weeding operation and remove water. After application of fertilizers store water | | | | | | | | | | | | |
| | | | | in the field. Regular supervision of the rice field should be carried out for any incidence of pests or diseases | | | | | | | | | | | | |
| | | | _ | Regular supervision of the rice field should be carried out for any incidence of pests or diseases. To control the weeds on field bunds, spraying of herbicide Gramoxzone @ 3 ml per lit. of water is advocated. | | | | | | | | | | | | |
| | | | | For control of blast disease in Nagli, need based application of Tricyclazole 10 gms or isoprothiolane 10 ml per 10 litres of | | | | | | | | | | | | |
| | | | | For control of blast disease in Nagli, need based application of 1 ricyclazole 10 gms or isoprothiolane 10 ml per 10 litres of water is suggested. | | | | | | | | | | | | |
| Nagli | | Tillering | | The incidence of wilt disease in Nagli is found, to control drenching with 1 gram Carbandazim per liter of water is | | | | | | | | | | | | |
| | | | advocate | advocated. | | | | | | | | | | | | |
| Groundnu | t | Seedling | Drain out | Drain out excess water from groundnut field wherever necessary and weeding should be done in groundnut field. | | | | | | | | | | | | |
| | | | If the app | If the application of fertilizer is completed in Mango, it is advocated to apply paclobutrazol during 15th July to 31st August | | | | | | | | | | | | |
| | | | _ | for regular bearing in Mango for trees having age more than 10 years. It is applied as per the canopy of tree i.e. East-West | | | | | | | | | | | | |
| | | | | of the canopy is 5 meters and North-South length of canopy is 3 meters, the average canopy will be 4 meters. Chemical | | | | | | | | | | | | |
| | | | | (cultar) contains 23 per cent active ingredient of paclobutrazol. So it should be given @ 3 ml/meter canopy of the tree. For | | | | | | | | | | | | |
| Mongo | | | | 4 meters the dose will be 12 ml/tree. Calculated quantity of paclobutrazol should be mixed in 3 to 6 litres of water as per | | | | | | | | | | | | |
| Mango | | - | | the canopy of the tree. Apply paclobutrazol solution below the tree canopy i.e. by making 25 to 30 holes 15 cm deep inside the fertilizer ring. In each hole apply 100 ml solution. Weeding should be done before and after application of | | | | | | | | | | | | |
| | | | | inside the fertilizer ring. In each hole apply 100 ml solution. Weeding should be done before and after application of paclobutrazol. There should be sufficient moisture in the soil during application. | | | | | | | | | | | | |
| | | | - | Protect the new flush from mango hoppers, leaf eating caterpillars, shoot borer and midge fly. If incidence is noticed, | | | | | | | | | | | | |
| | | | | spraying with Dimethoate 25 EC @ 12 ml or Monocrotophos 36 WSC @ 11 ml per 10 litres of water as per need is | | | | | | | | | | | | |
| | | | advocate | advocated. (Note - Add sticker @ 1 ml/1 litre of spray solution at the time of spraying of insecticides/fungicides) | | | | | | | | | | | | |
| | | | If the incidence CSRB is noticed in cashew, remove the grubs with the help of 15 mm chisel and application of | | | | | | | | | | | | | |
| Cashew | | - | | riphos 10 ml | | | | | | - | - | | | | | |
| | | | ground region is advocated. Cut the dead wood and diseased branches and apply 1% Bordeaux paste to the cut surface. | | | | | | | | | | | | | |
| | | | | There may be incidence of downy mildew and powdery mildew on vegetables. For their control need based spraying of | | | | | | | | | | | | |
| Vegetable | | Flowering | | crop with Dithane M-45 or Dithane Z-78 each @ 2.5 gm/lit. of water at an interval of 10 to 15 days. | | | | | | | | | | | | |
| | | | | Application of second dose of fertilizers to Okra @ 720 gms urea/R area, to Brinjal @ 1080 gms urea/R area and to Chilli @ 810 gms of urea/R area is recommended. | | | | | | | | | | | | |
