Agro-met Advisory

There is possibility of moderate to heavy rainfall from 29th June to 3rd July, 2019 and wind velocity ranges from 7 to 21 Kmph.
Extended range rainfall forecast for Konkan division for the period of 28th June to 4th July, 2019 is above normal.

Crop	Stage	Agro Advise
Kharif rice	Seedling	<ul style="list-style-type: none"> For preparation of main field for rice, carryout ploughing on moist soil after receiving of rain and incorporate 7.5 tonne FYM or compost per hectare at the time of ploughing. Repair the bunds of rice field. Due to forecast of heavy rain, make arrangement for drain out excess water from rice nursery. Prepare field for transplanting by puddling. At the time of puddling apply 87kg urea, 313 kg single super phosphate and 84 kg muriate of potash per hectare. If incorporation of 5 tonnes of glyricidia leaves per hectare is done then reduce the dose of nitrogenous fertilizers to 50 percent. Rice seedling with 5 to 6 leaves with height of 12 to 15 cm and 20 to 27 days old are consider ideal for transplanting. It is recommended to transplant 20 days old seedling in case of early rice varieties and 27 to 30 days old seedling in case of midlate and late rice varieties. Transplant 2-3 rice seedling per hill in case of straight varieties and one seedling per hill in case of hybrid at a spacing of 15 x 15 cm (early) or 20 x 15 cm (midlate and late varieties). follow upright and shallow (2.5 to 3.5 cm) transplanting of seedling.
Finger millet	Nursery	<ul style="list-style-type: none"> If water stress is observed in finger millet nursery, then provide irrigation. Apply 1 kg urea per guntha 15 days after sowing of finger millet nursery.
Sapota	-	<ul style="list-style-type: none"> There is possibility for fruit drop due to fungal disease during rainy season, to control the fruit drop, spray 1% bordomixture on to tree.
Vegetable/fruit crop nursery	Vegetative	<ul style="list-style-type: none"> If water stress is observed in vegetable nursery, then provide irrigation. If seedlings of brinjal and chill crops are ready for transplanting, transplant the seedlings on ridges and furrow with spacing of 60 X 60 cm. Dip the seedling for 5 minute in Dimethoate solution @ 1ml per liter of water before transplanting. Apply fertilizer dose of 8 tonne of FYM/Compost, 43 kg urea (for brinjal) 86 kg urea (for chilli), 125 kg single super phosphate and 33 kg of muriate of potash per acre at the time of transplanting. Provide irrigation immediately after transplanting.
Poultry	-	<ul style="list-style-type: none"> Provide clean and hygienic drinking water to poultry birds also maintain good aeration in poultry shed.

This Agro Advisory Bulletin (AAB) is prepared and published with the consultation and recommendation of SMS committees of
“Gramin Krishi Mausam Sewa (GKMS)” Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Dapoli.
