**Agro-met Advisory**

**There is forecast of light to moderate rainfall from 27<sup>th</sup> June to 1<sup>st</sup> July, 2020.**

Crop	Stage	Agro Advise
<b>General advice</b>	--	<ul style="list-style-type: none"> <li>As there is forecast for light rainfall during next five days, provide irrigation to re-established orchard in area affected by “Nisarg” cyclone.</li> </ul>
<b>Kharif rice</b>	<b>Seedling</b>	<ul style="list-style-type: none"> <li>As there is forecast for light rainfall during next five days, provide irrigation to rice nursery.</li> <li>As there is forecast for light rainfall, it is advise to transplant the rice seedlings where irrigation facility is available. Also provide irrigation to already transplanted rice seedlings.</li> <li>Transplant rice seedling with 5 to 6 leaves with height of 12 to 15 cm and 20-21 days old seedling in case of early rice varieties and 27 to 30 days old seedling in case of midlate and late rice varieties. Prepare field for transplanting by puddling. At the time of puddling apply 87 kg urea, 313 kg single super phosphate and 84 kg muriate of potash per hectare. If incorporation of 5 tonnes of glyricidia leaves per hectare is done then reduce the dose of nitrogenous fertilizers to 50 percent.</li> <li>Transplant 2-3 rice seedlings per hill in case of straight varieties and one seedling per hill in case of hybrid at a spacing of 15 x 15 cm (early) or 20 x 15 cm (midlate and late varieties). follow upright and shallow (2.5 to 3.5 cm) transplanting of seedling.</li> <li>In SIRA method of rice cultivation, incorporate 2 tonnes per acre glyricida leaves at the time of puddling. Transplant improved or hybrid rice seedlings at a controlled spacing (15-25 cms). place urea-DAP briquette at depth of 7.5 to 10 cms in between four hill.</li> <li>Due to intermittent rainfall and increase in humidity, there is possibility of incidence of army worm in rice nursery, hence observe crop regularly for infestation of pest. Keep bunds weed free. And if incidence is noticed, spray Lambda cyhalothrin 5% EC @ 6 ml per 10 liter of water (Note: insecticide is not under label claim).</li> <li>For controlling the crabs from rice field, in initial stage collect the crabs in torch light for 2 to 3 nights and destroy it. Then use bait prepare with the help of cook rice from 1 kg of raw rice and add insecticide Acephate 75WP @ 75 gm and make 100 arecanut size balls and keep them in each crab burrow and close it with wet mud. On the next day if some of the burrows are found open, again put the bait. For better control continue it for 7 days and also perform cooperatively with other farmers (Note: insecticide is not under label claim).</li> </ul>
<b>Finger millet</b>	<b>Nursery</b>	<ul style="list-style-type: none"> <li>As there is forecast for light rainfall during next five days, provide irrigation to finger millet nursery.</li> </ul>
<b>Cashewnut</b>	<b>Vegetative</b>	<ul style="list-style-type: none"> <li>For control of leaf drop in cashewnut, spray 0.2% Mancozeb @ 20 ml per 10 liter of water on entire tree.</li> </ul>
<b>Jackfruit</b>	<b>Vegetative</b>	<ul style="list-style-type: none"> <li>For above five year old jackfruit tree, apply 20 kg well decomposed F.Y.M. along with 1 kg urea, 1.5 kg single super phosphate and 500 gm muriate of potash in circular basin. Apply 1/5<sup>th</sup>, 2/5<sup>th</sup>, 3/5<sup>th</sup> and 4/5<sup>th</sup> of above-mentioned fertilizer dose per tree for 1,2,3 and 4-year-old jackfruit orchard, respectively.</li> </ul>
<b>Vegetable crops</b>	<b>Vegetative</b>	<ul style="list-style-type: none"> <li>As there is forecast for light rainfall during next five days, provide irrigation to vegetable crops.</li> </ul>
<b>Cucurbitaceo us crops</b>	<b>Vegetative</b>	<ul style="list-style-type: none"> <li>As there is forecast for light rainfall during next five days, provide irrigation to cucurbitaceous crops.</li> </ul>

- |  |  |  |
|--|--|--|
|  |  | <ul style="list-style-type: none"><li>• Proper support should be given to cucurbitaceous crops which are in growing stage.</li></ul> |
|--|--|--|

Note : Spray insecticide or fungicide solution and apply fertilizers when intensity of rainfall is low. Mix sticker into spraying solution.

**This Agro Advisory Bulletin (AAB) is prepared and published with the consultation and recommendation of SMS committees of “Gramin Krishi Mausam Sewa (GKMS)” Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Dapoli. For more information contact nearby SAU research station or Agriculture officers of Agriculture Department, Maharashtra state.**
